Husky Model 4620 Pressure/Vacuum Vent Valve.
CARB Approval Letter # 97-16

Dear Mr. Fink:

Thank you for your letter dated June 21, 2000, requesting the addition of the Husky Model 4885 Pressure/Vacuum (P/V) vent valve to the certification of the Husky model 4620 P/V valve approval, CARB Approval Letter # 97-16.

CARB Approval Letter # 97-16 certified the Husky 4620 P/V vent valve and the Husky Model 4702-threaded adapter. The 4620 PV valve has a foam seal and four set screws for attaching the valve to an unthreaded 2" pipe. The Husky Model 4702 pipe adapter allows the 4620 to be used on a threaded pipe. The Husky Model 4885 PV valve incorporates both the 4620 PV valve and the 4702 pipe adapter into a single unit which may be installed on threaded vent pipes only.

Because the Husky Model 4620 and the Model 4885 PV valve have identical internal mechanisms, have the same performance characteristics and differ only in the means in which they are attached to a vent pipe, the Husky Model 4885 PV valve shall be included in the certification of the Husky Model 4620 PV vent valve.

If you have any questions or wish to discuss this matter further, please call Paul Thalken at (916) 445-0383.

Sincerely,

James J. Morgester, Chief
Compliance Division

California Environmental Protection Agency
